

Werner^{3rd} System Type: *atis* LeadershipSubsystem

(Werner^{3rd} System type is part of the metatheory and describes configurations and properties that characterize a specific system.

There are 5 main Werner^{3rd} subsystems that partition a system into 5 subsystems.)

Leadership Subsystem, \mathcal{W} , =_{df} the subsystem of a Werner^{3rd} system comprised of the Werner^{3rd} command, control, communication, and intelligence subsystems.

$$\mathcal{W} =_{df} \mathcal{S}^{\hat{u}} \mid \mathcal{C}\mathcal{W}, \mathcal{L}\mathcal{W}, \mathcal{C}\mathcal{W}, \mathcal{I}\mathcal{W} \in \mathcal{S}^{\hat{u}} = \mathcal{S}^{\hat{u}}_{C3I}$$

Leadership subsystem is a Werner^{3rd} subsystem; such that, the Werner^{3rd} command, control, communication and intelligence subsystems are elements.

(‘C³I’ designates the four Werner^{3rd} subsystems of command, control, communication and intelligence.)

Key Terms: system, subsystem, command subsystem, control subsystem, communication subsystem, intelligence subsystem.
