

## System Type: *atis* **NegasystemEnvironment**

(*System type* is part of the metatheory and is defined by characterizations of those system properties that define such a system.)

**Negasystem environment**,  $\mathfrak{S}''$ , =<sub>df</sub> The negasystem's corresponding system.

$$\mathfrak{S}'' =_{df} \mathfrak{S}$$

**Negasystem environment** is defined as the system. (See 'system'.)
